IMPACT OPTION #7 (RESCUE IN GHANA = \$30,000)

What: Fund a full rescue operation of 30 children from slavery in the commercial fishing trade on Lake Volta in Ghana. Rescues involve several months of investigative research in the source community to piece together pictures and information about each child and the trafficker/s and which lakewide village they are most likely to have been taken to. Then travel to the lake (8-12 hours away depending on the village) where we search for children and traffickers in villages and on the lake by boat. On the lake our rescue team is accompanied by two armed police as they go boat to boat. It can be violent.

After rescue children are taken to our nearby safehouse for a couple of days to get settled and treated before moving to our recovery center back in the source community for a period of rehabilitation.

You can fund a full rescue operation of 30 children for \$30,000 (\$1000 per child)
